Bring your friends home.

A playable campaign for 2-12 people

Humans and Zombies share their own strength pools. Each person has a named, persistent character and four action cards. Both factions need at least one player to begin. One person facilitates; they may play a character offline, but the Twitch broadcaster account is excluded from chat play.

What to print

Print the four landscape tiled board pages at 100% / Actual size (auto-rotate), trim to their borders and join matching edges. Or print the separate A3 board at Actual size. Print the action-card sheet once per player. Print character sheets as needed, plus one copy of event, encounter, crafting, token and journal pages. Cards are 2.5 x 3.5 inches. Paper sleeves and scrap card backing are optional.

Only your C2G artwork

All illustrations are original supplied Cradle to the Grave assets: characters, trees, grass, houses, rocks, equipment and enemy portraits. No stock or generated artwork. Printed boxes, text and tracks are functional layout. The Mega Mech card uses an existing C2G support-weapon emblem, not an invented boss portrait.

Set up chapter one

Start both strength pools at 100, settlement integrity at 70 and supplies at 0. Each player names a character and chooses Human or Zombie. Give each player Attack, Defend, Heal and Surge. Start the Woodland encounter, round 1. Shuffle the six event cards. No equipment is owned initially.

Two speeds, one campaign

Offline: the paper journal is authoritative. Connected: the companion resolves rounds and records the channel campaign; paper is a display. Do not also apply the printed arithmetic to the server. A self-hosted local companion needs no Twitch account or paid service. Prototype rules are playtest values, not claims of shipped C2G combat.

One round at the table.

1 / Prepare and choose

Apply the encounter condition for this round. Optionally draw one event card, resolve it, then return it to the deck and reshuffle. Players discuss, choose one action face down, and reveal together. Count each person once. Everyone who has taken an action this battle remains a participant for its duration.

2 / Find each majority

Each faction executes its most-voted action. Ties prioritize Attack, then Defend, then Heal, then Surge. A faction with no votes takes no action. In a connected game, Twitch viewers vote using !attack, !defend, !heal or !surge; the first accepted vote counts until the host reveals.

3 / Prepare, then strike

Resolve both teams' Defend, Heal and Surge first. Then calculate both attacks from that same state and apply damage simultaneously. A knockout ends the battle; simultaneous knockouts draw. At the end of round 12, higher strength wins; ties use participating players, then draw.

4 / Advance

Move the round marker. Surge can recharge three rounds after its last successful charge: charged in round 1, available again in round 4. Set its ready-round marker immediately. Choosing Surge too early wastes that faction's action. Shields and unspent Surge persist until consumed, but never stack.

Track precisely

Attack damage can end in .5 after a shield. Keep the half-strength marker; do not round. Strength = tens + ones + optional half. Example: 92.5 uses tens 90, ones 2 and half. At 100, use tens 100 and ones 0. Counters, equipment and records on paper must match the companion when connected.

Actions and support.

Attack

Normal damage = (5 + your participating players), doubled if Surge is ready. Add +2 if your faction has a crafted support weapon, +3 if Frenzy is ready, and +3 if it has a Barrage charge. Cap this total at 25. An opposing shield halves it, then is consumed. Consume Surge, Frenzy and one Barrage charge on Attack, even if a mole is underground and damage becomes zero.

Defend / Heal / Surge

Defend: prepare one shield against the next hit. Heal: restore 3 + floor(participants / 2), at most 15, never above 100 strength. Surge: prepare double base damage on the next Attack, with a three-round recharge. None of these effects stacks with itself.

Crafting

After every tabletop battle with participants, both factions gain one component: Launcher after the first, Bipod after the second, Sensor after the third, then repeat. Between battles, consume one of each to equip a support weapon. Each faction may equip one; it persists for the campaign. Extra components can be kept but provide no further bonus.

Frenzy and Barrage

Frenzy is a one-use +3 Attack bonus. A new Frenzy replaces, rather than stacks with, an existing one. An earned Barrage sets that faction to three charges; one charge adds +3 to each of its next three Attacks. Charges and Frenzy expire at battle end. This tabletop version has no Bits purchases or paid Barrage shots.

Twitch effects

In tabletop pace, eligible follows heal +2; subscriptions can charge Surge, and subscription/gift events add clinic supplies. Raids/Hype can create a convoy; represented Hype teams gain Frenzy. Existing follow protection applies. Supply Drop heals both +5. Freeze skips the next reveal; reveal even with no votes. Fog has no extra effect because votes are already hidden. Offline events use the same resource and objective rules.

Consequences that stay.

After a battle

Human victory: settlement +10. Zombie victory: settlement -10. Draw: no integrity change. Keep integrity within 0-100. A battle with participants earns 3 shared supplies (maximum 99). Human victory with a convoy earns 3 additional supplies, then the convoy is cleared. Empty battles yield no supplies or equipment.

Infection and recovery

Participating Humans become infected after a Zombie victory. An infected character must join Zombies next battle. Between battles, spend 3 community supplies to recover one infected character; they can return to Humans. Absence does not harm a character. Each participated chapter advances Recruit to Survivor; at five, Veteran. Rank currently grants no stat bonus.

Approved emergency rule

Between battles, if every registered character is infected and supplies are below 3, recover one volunteer for free. Lose 10 settlement integrity and record the emergency. This is not available merely because one team has no seated players. If integrity reaches zero, evacuate and establish a refuge at 50. Regular rescue remains preferred whenever affordable.

The 100-chapter framework

Mark one numbered space per completed campaign chapter. This is a record of a long campaign, not 100 different authored encounters. Tabletop encounters unlock after 0, 1, 2 and 4 completed tabletop battles: Woodland, Moles, Shields, Mega Mech. Choose any unlocked encounter between battles. The printable journal supports continuation beyond 100 by starting another sheet.

The living chronicle

Record names, chapter counts, wins, infection, rescues, strength result, settlement, supplies, components, equipped support and convoy outcome. At zero integrity, record the evacuation before resetting to 50. There is no permanent death or forced retirement in this edition.

Connect the physical table.

Local companion

Run the Frenemies 1.4.0 build (Node.js 22+, npm ci, npm start). Open http://localhost:3000 and choose Start physical tabletop companion. On this project computer use port 3005. The local campaign saves to DATA_DIR. Re-seat existing names after a restart. Mid-battle state is not restart-safe; finish a chapter before shutting down.

Same Twitch room

For a channel campaign, sign into Twitch through Frenemies, then open /tabletop from stream controls. Select an unlocked encounter and Use tabletop pace between battles. Seat physical players. Viewers join in chat. Do not represent the same person both at the table and in chat: that would create two identities and two votes.

Resolve once

Start a battle. The host enters revealed physical cards and presses Resolve simultaneous round. Chat votes collected since the previous reveal are included. The server is authoritative, the board refreshes every two seconds, and the existing stream overlay receives the same state. Optional Mega Mech orders are entered by the host after the Zombie team chooses its majority order.

Offline and hosted demo limits

The paper game needs no app, internet, purchase or account. Hosted demo rooms are temporary; Download campaign journal before leaving. Local tabletop and real Twitch campaign records persist, but battle progress does not. Journal export is a readable backup, not an automatic import or reconciliation feature. Never apply an offline result again to a live campaign.

Test this edition

Play three battles with equal teams. Record rounds played, actions chosen, first-player confusion, recovery choices and crafting timing. Test each encounter before adjusting balance. Keep the 12-round and three-round Surge values marked as prototype settings. Real Twitch Bits onboarding is a separate unresolved dependency, not required by this board game.

Action cards / print per player

ACTION
ATTACK

Deal 5 + participants.
Surge doubles the base.
Add equipment / Frenzy / Barrage.
Cap 25; shield halves.

FRENEMIES / C2G

ACTION
DEFEND

Prepare one shield.

Halve the next incoming hit, then remove the shield.
No stacking.

FRENEMIES / C2G

ACTION
HEAL

Restore 3 + half your participants, rounded down.
Maximum 15 healing.
Never exceed 100 strength.

FRENEMIES / C2G

ACTION
SURGE

Double base damage on your next Attack.

Recharge after 3 rounds.
No stacking.

FRENEMIES / C2G

Event deck / shuffle after drawing

EVENT
REINFORCEMENTS

Both factions restore 2 strength, up to 100. Apply immediately.

FRENEMIES / C2G

EVENT
RESCUE CONVOY

Set one convoy objective. Next played battle: Human win earns +3 supplies. No stacking.

FRENEMIES / C2G

EVENT
FRENZY

Both factions prepare +3 on their next Attack, within the 25 cap. One-use; no stacking.

FRENEMIES / C2G

EVENT
BARRAGE CACHE

Both factions set Barrage to 3 charges. Each next Attack consumes one for +3, capped at 25.

FRENEMIES / C2G

EVENT
CLINIC SUPPLIES

Add 1 shared supply. Maximum 99. Save it for recovery between battles.

FRENEMIES / C2G

EVENT
QUIET WATCH

No immediate effect. The teams choose their actions as normal.

FRENEMIES / C2G

Encounter deck / choose one

ENCOUNTER / 1

WOODLAND

Always available.

Before rounds 4 and 8, both factions gain a shield as a new wave arrives.

FRENEMIES / C2G

ENCOUNTER / 2

MOLE AMBUSH

After 1 tabletop battle.
Odd rounds: Human attacks deal zero against underground Zombies.
Even rounds: revealed.

FRENEMIES / C2G

ENCOUNTER / 3

SHIELD FORMATION

After 2 tabletop battles.
Before rounds 1, 5 and 9: Zombies gain a shield; Humans gain one-use Frenzy.

FRENEMIES / C2G

ENCOUNTER / PROTOTYPE

MEGA MECH

After 4 tabletop battles.
Instead of its action, Zombie majority chooses Missile (charge +3 next Attack, twice) or Brace (shield, once).

FRENEMIES / C2G

Crafting bench / use faction markers

CRAFTING
GRENADE LAUNCHER
